

photograph may be peeled from said liner and said photographic paper, said photograph being released by said adhesive on said liner so said photograph is not sticky.—

--6. (New) A method of making a photograph, said method consisting of the steps of:  
providing a sheet of photographic paper releasably carried by a paper liner coated with an adhesive;  
printing a photograph onto said photographic paper in a pre-determined field;  
making a cut through said photographic paper but not through said paper liner along said pre-determined field; and  
peeling said photograph from said liner to separate said photograph from said adhesive and said paper liner, said adhesive remaining with said paper liner and not with said photograph.—

-- 7. (New) The method of claim 6, wherein said photograph has a size and said pre-determined field corresponds to said size of said photograph.—

-- 8. (New) The method of claim 6, further comprising the step of cutting said photographic paper and paper liner at a location spaced apart from said cut.—

---
